

计算机科学与技术专业培养方案（2024 级）

Curriculum for Undergraduate of Computer Science and Technology Major（2024 级）

一、专业介绍

本专业从 1988 年开始招收本科生，1996 年建成为湖北省重点学科，2005 年获得计算机科学与技术一级学科硕士学位授予权，2010 年获批国家特色专业立项建设，2011 年获得模式识别与人工智能二级博士授予权，2014 年获批国家级虚拟仿真实验教学中心，2015 年获批国家级实验教学示范中心和教育部高等学校计算机类专业教学指导委员会“高等学校计算机系统能力培养研究项目”第一批试点单位，2016 年获批湖北省级示范实习实训基地建设，2019 年获批国家级一流本科专业建设点，2023 年通过工程教育专业认证。

I. Professional Introduction

This major began to enroll undergraduates in 1988, was established as a key discipline in Hubei Province in 1996, was granted the right to confer the Master's degree in Computer Science and Technology in 2005, was approved for the project of building a national characteristic specialty in 2010, was granted the right to confer the doctoral degree in Pattern Recognition and Artificial Intelligence in 2011, was approved for the establishment of a national virtual simulation experimental teaching center in 2014, was approved for the establishment of a national experimental teaching demonstration center in 2015, was approved as one of the first pilot units of the "Research Project on

Cultivating Computer System Capabilities of Universities" by the Teaching Committee of the Computer Science and Technology Major of the Ministry of Education in 2015, was approved for the construction of a Hubei provincial exemplary internship and practice base in 2016, was approved for the construction of a national top-class undergraduate major in 2019, and passed the engineering education professional accreditation in 2023.

二、培养目标

本专业培养德智体美劳全面发展、思想素质高、基础扎实、知识面宽、实践能力强、具有国际视野和创新精神、能适应计算机科学与技术发展需要的拔尖创新型人才。该专业毕业生能够对计算机学科的前沿有较深的了解、熟悉最新的系统开发平台和开发工具，能够从事计算机软硬件设计及计算机应用系统的研制和开发，能够将计算机科学与技术领域的基础理论和专门知识用于解决复杂工程问题，能够在互联网、信息产业、钢铁冶金等行业的计算机相关领域部门中从事计算机软硬件系统的研究、设计、开发、工程管理工作。期待毕业生五年左右达到以下目标：

1. 积极投身社会主义建设事业，自觉践行社会主义核心价值观，具有良好的人文素养、社会责任感，遵守职业道德和规范。
2. 能够将数学、自然科学和专业知知识用于解决在计算机及相关领域遇到的复杂工程问题。
3. 能够设计针对计算机领域复杂工程问题的解决方案，能够在计算机相关领域的复杂工程项目中胜任研究、设计、开发和项目管理工作。

4. 具有一定的国际视野，能在多学科、多文化背景下与业界同行及社会公众进行有效沟通和交流，能够胜任团队的核心或领导工作。
5. 能够适应国民经济发展需求、不断地自主学习，在工作中不断创新。

II. Training objectives

This major trains undergraduate students to be good humanistic quality, international vision, innovative spirit, solid theoretical knowledge and professional skills of computer science and technology, strong team cooperation ability and lifelong learning ability. Make it become a qualified builder and reliable successor of the socialist cause of all-round development of morality, intelligence, physique, beauty and labor. High-quality application-oriented talents who are capable of working in computer related departments of Internet, information industry, iron and steel metallurgy, engaged in the design and development of computer hardware and software systems, system testing, operation and maintenance, project management and other work.

Graduates of this major are expected to achieve the following professional abilities in about 5 years of work:

1. Have a good human arts literacy, social responsibility, adhere to professional ethics and norms, and be able to consider the impact of social, health, safety, legal, cultural and environmental factors in the practice of engineering projects in computer and related fields.
2. Be able to use mathematics, natural science and professional knowledge to solve complex engineering problems in computer and related fields in software

and hardware system research and development, analysis and design, development and testing, project management and other engineering practices.

3. Capable of designing and developing computer hardware and software systems, system testing, operation and maintenance, project management, etc. in computer related departments in information industry, iron and steel metallurgy, automobile and shipbuilding, financial and trade industries.

4. Good expression, communication, coordination and leadership skills as well as foreign language application skills; able to organize and manage project teams in this field in a multi-disciplinary and multi-cultural context.

5. With a good international vision and lifelong learning ability, I can actively adapt to the changes of social development and career development demands, constantly update my professional knowledge and improve my personal ability and technical level through independent learning.

三、专业特色

1. 依托以两大国家级教学中心为核心的实践基地集群，夯实学生专业基础，提升学生实践创新能力。

2. 围绕强专业基础、重工程应用和具备国际竞争力的三位一体人才培养目标，建立多层次教学体系，适应社会对多样化应用型人才的需求。

3. 健全学生课外科技活动和创新创业活动社团组织，扩大课外科技活动和创新创业活动受众，引领学生的创新创业文化。

III. Professional characteristics

1. Relying on a cluster of practical bases with two national-level teaching centers at its core, we aim to solidify students' professional foundations and enhance their practical innovation capabilities.
2. Centered around the tripartite talent cultivation goals of strengthening professional foundations, emphasizing engineering applications, and fostering internationally competitive individuals, we aim to establish a multi-level teaching system to meet the diverse demands of society for applied talents.
3. We aim to strengthen extracurricular scientific and technological activities as well as innovation and entrepreneurship club organizations for students, expand the audience for extracurricular scientific and technological activities and innovation and entrepreneurship activities, thus lead the culture of innovation and entrepreneurship among students.

四、毕业要求

1. 工程知识：具备数学、自然科学知识，系统掌握计算机领域的工程基础和专业知识，能够将相关知识用于解决计算机领域的复杂工程问题。
2. 问题分析：能够综合运用数学、自然科学和工程科学的基本原理和方法，通过文献研究，对计算机领域的复杂工程问题进行识别、表达和分析，以获得有效结论。
3. 设计/开发解决方案：能够综合运用理论和技术手段，针对计算机领域的复杂工程问题提出解决方案，设计满足特定需求的计算机软硬件系统、模块或开发流程，能够在设计中体现创新意识，并能够综合考虑社会、健康、安全、法律、文化以及环境等制约因素。

4. 研究：能够基于科学原理并采用科学方法对计算机领域的复杂工程问题进行研究，制定技术路线、设计实施方案、分析解释实验数据，通过信息综合得到合理有效的结论。
5. 使用现代工具：能够针对计算机领域的复杂工程问题，开发、选择与使用恰当的软硬件开发环境与工具、信息检索与分析工具，对复杂计算机工程问题进行仿真与模拟，并能够理解其局限性。
6. 工程与社会：能够基于计算机工程相关背景知识进行合理分析，评价计算机领域软硬件开发、系统设计等工程实践和复杂工程问题解决方案对社会、健康、安全、法律以及文化的影响，并理解应承担的社会责任。
7. 环境和可持续发展：具有环境保护和可持续发展的意识，能够理解和评价针对计算机领域的复杂工程问题的工程实践对环境、社会可持续发展的影响。
8. 职业规范：具有良好的人文社会科学素养和较强的社会责任感，树立和践行社会主义核心价值观，能够在计算机软硬件系统设计与开发等工程实践中理解并遵守工程职业道德和规范，履行计算机工程师的社会责任。
9. 个人和团队：具有较强的团队合作意识与能力，能够正确理在多学科背景下的团队中承担个体、团队成员以及负责人的角色，并承担相应责任和义务。
10. 沟通：能够就计算机领域的复杂工程问题与业界同行及社会公众进行有效沟通和交流，能够撰写报告和设计文稿、陈述发言、清晰表达或回应指令，并具备一定的国际视野，能够在跨文化背景下进行沟通和交流。

11. 项目管理：理解并掌握计算机工程项目的成本、进度、范围、质量、风险等管理原理与经济决策方法，并能在多学科环境中应用。

12. 终身学习：具有自主学习和终身学习的意识，能够追踪计算机专业领域的发展动态，有不断学习和适应发展的能力。

IV. Requirements

1. Engineering knowledge: I have the knowledge of mathematics and natural science, have a systematic grasp of the engineering foundation and professional knowledge in the field of computer, and can apply the relevant knowledge to solve complex engineering problems in the field of computer.

2. Problem analysis: I can use the basic principles and methods of mathematics, natural science and engineering science comprehensively to identify, express and analyze complex engineering problems in the field of computer through literature research, so as to obtain effective conclusions.

3. design/development solutions: can the integrated use of theory and technology, in view of the complex engineering problems put forward solutions in the field of computer, designed to meet the specific needs of the computer hardware and software system, module, or the development process, is reflected in the design innovation, and to consider the social, health, safety, legal, cultural, and environmental factors, etc.

4. Research: I can study complex engineering problems in computer field based on scientific principles and using scientific methods, formulate technical routes,

design implementation plans, analyze and interpret experimental data, and draw reasonable and effective conclusions through information synthesis.

5. Use modern tools: Able to develop, select and use appropriate software and hardware development environments and tools, information retrieval and analysis tools, simulate complex computer engineering problems, and understand their limitations for complex engineering problems in the computer field.

6. Engineering and society: Be able to conduct reasonable analysis based on relevant background knowledge of computer engineering, evaluate the impact of engineering practices such as software and hardware development and system design in computer field and solutions to complex engineering problems on society, health, safety, law and culture, and understand the social responsibilities that should be undertaken.

7. Environment and sustainable development: with the awareness of environmental protection and sustainable development, able to understand and evaluate the impact of engineering practices for complex engineering problems in the field of computer on the sustainable development of the environment and society.

8. Professional norms: have good humanistic and social science literacy and strong social responsibility, establish and practice the socialist core values, be able to understand and abide by the engineering professional ethics and norms in the design and development of computer software and hardware systems and

other engineering practices, and fulfill the social responsibility of computer engineers.

9. Individual and team: Strong sense and ability of teamwork, able to correctly assume the roles of individual, team member and leader in a multi-disciplinary team, and assume corresponding responsibilities and obligations.

10. Communication: able to effectively communicate and communicate with industry peers and the public on complex engineering issues in the field of computer, able to write reports and design documents, make presentations, clearly express or respond to instructions, and have a certain international perspective and be able to communicate and communicate in a cross-cultural context.

11. Project Management: Understand and master the management principles and economic decision-making methods of computer engineering projects, such as cost, schedule, scope, quality and risk, and be able to apply them in a multidisciplinary environment.

12. Lifelong learning: have the awareness of self-learning and lifelong learning, can track the development of the computer field, have the ability to constantly learn and adapt to the development.

五、专业主干课程

面向对象程序设计，离散数学，数据库系统原理，数字逻辑与数字系统，计算机组成原理，数据结构，操作系统，软件工程，算法设计与分析，计算机网络，单片机技术，嵌入式系统，计算机系统结构。

V. Core courses

Object-Oriented Programming, Discrete Mathematics, Principles of Database System, Digital Logic and Digital System, Principles of Computer Organization, Data Structure, Operating System, Software Engineering, Algorithm Design and Analysis, Computer Network, Single-Chip Microcomputer Technology, Embedded Systems, Computer Architecture.

六、基本学制：四年

VI.Recommended length of the program: 4 years

七、授予学位：工学学士

VII. Degree: Bachelor of Engineering

学生修满所规定的最低毕业学分，符合武汉科技大学授予学士学位规定，授予工学学士学位。

八、毕业学分要求：160 学分

课程类型		学分要求	课程类型		学分要求
1、公共课程平台		41	3、专业课程模块		47.5
公共基础课程		28	专业必修课程		41.5
通识教育课程	必修	7	专业选修课程		6
	选修	6	4、实践教学模块		33
2、学科基础平台		32.5	大类实践课程		3
大类学科基础课程	必修	9	专业实践课程	必修	30
	选修	0		选修	0
专业学科基础课程		23.5	5、素质拓展模块		6

VIII、毕业学分要求：160 学分

Type of courses		Academic credits	Type of courses		Academic credits
